

# SYARIKAT CERAMECH

## The Syarikat Ceramech Traveling Slab Roller

Syarikat Ceramech make a series of Traveling Slab Roller Table, tailored to the users requirement.

The main roll is of 100mm OD Stainless steel. All framings are of thick MS angles and hollow section, suitably painted. The working deck is of fiberboard, each 3mm thick. The base board is thick plywood.

A canvas cloth is provided.

Legs can be built so that it is less bulky for transport. Assembly will be required if so. A leveling pad can be supplied to one of the legs if required.

The working Table dimensions are: 610mm x 1220mm  
910mm x 1520mm

The working height of the table is adjustable: 750mm to 900mm.

The roll, drive, and guide wheels have ball bearings.

The drive shaft incorporates 2 sprocket, and 2 sets of adjustable chain for ease of alignment.

Syarikat Ceramech also built a series of Gas fired and Electric Kilns, Blungers, High Speed Mixers and other equipment for the Ceramic Industry.
